Intent	Implementation	Impact
<p>The Art curriculum at St Philip's is one which will allow students to become self-motivated and confident learners, who can work independently and as part of a team. The main aim is to ensure that learners develop technical and practical competencies to support them as they progress through the art curriculum. Throughout the art curriculum, pupils will have the opportunity to be creative problem solvers and to also develop as responsible citizens ready to make a positive contribution to society</p>	<p>Throughout the progression of knowledge and skills in the art curriculum the children will be provided with the opportunities to experiment, explore and develop their ideas using a variety of forms. Topics are selected which will be of particular importance to our children and will build on their prior learning. At St Philip's we deliver an art curriculum in which pupils express creativity through their art work and produce high quality outcomes. Students will learn about important artists throughout history and will investigate and create designs in a variety of genres, styles and traditions.</p>	<p>Pupils are able to combine their designing and making skills with knowledge and understanding, in order to design, make, analyse and evaluate products of high quality. Children express their own creativity through their designs and are able to confidently justify their choices. Collaborative skills are honed so they can work successfully with a group, as well as on their own. Throughout the art curriculum, pupils will develop their skills of being able to improvise, adapt and overcome problems</p>

<p>Our curriculum drivers</p> <p>To be evidenced throughout the Art and Design curriculum</p>	<p>An understanding of how to develop into global citizens in the modern world</p> <p>Develop effective learning relationships by working collaboratively with others and presenting ideas clearly</p> <p>Strong communication within and beyond our school community towards a common goal</p> <p>Demonstrate creativity within our work</p> <p>Making connections with prior learning develop new knowledge in the long term memory</p> <p>Thinking critically to question information, seek answers to questions and to ask 'why' in our learning</p>
